pH: 3.78
TA: 4.6 gr/L expressed in tartaric acid
RS: 2.0 gr/L
Free So2: 32 mg/L
Total So2: 80 mg/L

VINIFICATION:

The different varieties were vinified separately. The bunches were selected and submitted to a pre-fermentation cold maceration followed by fermentation at 27°–28°C and ending with a post-fermentation maceration for a period determined by enological tastings. Malolactic fermentation took place in temperature-controlled tanks prior to racking the wine to barrels.

TASTING NOTES:

Intense purplish-red in color with ruby-red nuances. The nose presents complex aromas and spice notes. The palate is broad and velvety with firm tannins, sweet persistence, and a long finish.

WINEMAKER:

Johana Pereira.
